

# Advanced Variance Analysis (AVA)

Minimize fuel loss and maximize profit.

## Detect Fuel Loss in Real Time

Identify anomalies like temperature changes, theft, fraud, leakage, delivery issues, dispensing equipment issues, and operational errors to reduce dispenser losses. Identify root cause of slow flow & water ingress issues and fuel theft & fraud from the terminal to the dispenser.

## Respond 24x7x365

Real-time monitoring and agent support to respond to deissues faster. Speak with experts with proven experience analyzing wet stock data.

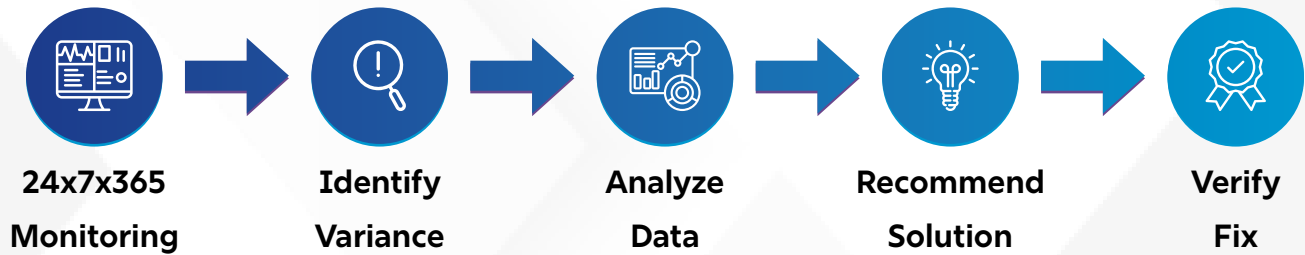

## Reduce Unaccounted Fuel Variances

Real-time identification of fuel loss issues enable operators to quickly respond and correct problems to maximize site uptime and profitability.

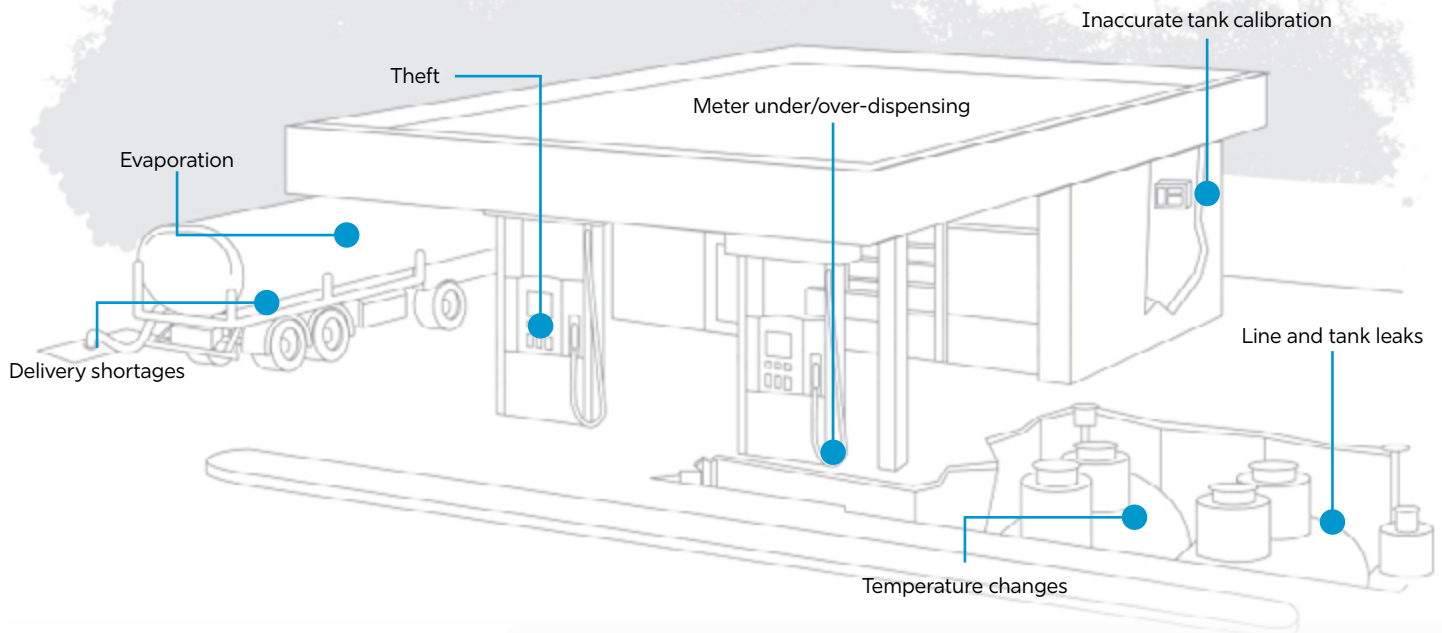

# Advanced Variance Analysis (AVA)

## Are inventory variances affecting your profits?

AVA empowers proactive control over fuel loss and ensures HSE regulatory compliance.

Track every gallon of fuel from delivery to consumption, accurately identifying issues such as theft, fraud, leakage, deliveries, gray loads, dispensing equipment, and operational errors – all without the need for expensive add-ons.

Account for every gallon of fuel 24x7x365 with support across your entire fueling network with Invenco Advanced Variance Analysis (AVA) today.
